Longevity Cure Overview

We understand that true transformation and lasting well-being go beyond a temporary escape. Our goal is to inspire and empower you with the tools and knowledge to integrate these habits effortlessly into your daily life.

Our Pure Longevity programme consists of three distinct phases, using real data to create a program unique to you.

Through a comprehensive assessment of your present well-being, followed by our renewing longevity protocol, we will set the foundations for understanding and resetting the body.

We will then start targeted, result-driven treatments chosen to reflect your individual goals and objectives derived from our four treatment pillars.

Pure Longevity

Cure Phases

Phase 1 of the Longevity Programme delves into a deeper understanding of your unique genetic composition and your current nutritional intake to determine your specific wellness needs.

Phase 2 offers a combination of pioneering biohacking treatments designed to regenerate the body at a cellular level. This phase is the essence of the cure, aimed at healing and supercharging the body. Our academy helps you implement efficient daily rituals at home that lay the foundation for new long-lasting wellness habits.

Phase 3 is dedicated to tailoring your wellness goals to your specific needs. Choose from one of our four pillars and experience the transformative benefit of targeted treatment plans. Alternatively you can add a 100% personalise package from our target treatment menu.

Phase 1

Health Intelligence

Your Health

Phase 1 of the Longevity Programme delves into a deeper understanding of your unique genetic composition and your current nutritional intake. You will receive a comprehensive digital snapshot of how your cells, mitochondria, and microbiome are functioning. This will help you better understand the effects of your diet and lifestyle on your immunity, mitochondrial and cellular health, internal biological age, and gut microbiome. We will also look at mobility, pain management, sleep and stress factors to give a full overview of your current wellbeing.

Nutrition

We work against the tide of fad diets that cause extreme weight loss and traumatise the body and mind. Our innovative functional approach takes into account your personal objectives, preferences, health requirements, and emotional well-being. With information collected from our health tests, we can then design tailored and achievable programs that work in harmony with your body, creating a profound effect on various diet-related issues while ensuring an enjoyable journey.

Our core aim is to re-educate you on how to eat in harmony with your body and create lasting improvements to your well-being that transcend your time with us.

P1 Health Intelligence

A Comprehensive Overview

With scientifically-backed results on what your body needs at the molecular level, our team will have the information needed to offer you a program truly tailored to your unique personality.

Our partners at Viome are pioneers in Health Intelligence™. Your genes are turned on or off by your gut bacteria, diet and environment. Once you know how your cells or mitochondria work, you can have specific nutritional actions to help and support them.

Cryo- Therapy

Our cryotherapy treatment involves exposing the whole body in a cold room to -110°C in short-term exposure. It causes your body to move blood toward the core, protecting your organs. During this process, the body increases its oxygen levels and certain proteins that can act in an anti-inflammatory manner.

The strong analgesic effect breaks pain memory, which chronic pain can serve to over-activate -while also promoting its re-regulation. When you exit the Cryotherapy chamber and return to normal room temperature, this oxygen-rich blood moves back through the body, creating a euphoric effect that can be felt after just one treatment.
